“VERSION WITH MARKINGS TO SHOW CHANGES MADE”

Claim #1 (currently amended) – ~~Improved accessibility to bags and/or contents as a result of liner descent/ascent feature.~~
The flexibility of the elastic material utilized in the manufacture of the “Fit N’ Bag” liner provides expansion and contraction for the descent/ascent feature.

Claim # 2 (original) – Minimized back bending on users part resulting in fewer back strains.

Claim # 3 (original) – The “Fit N’ Bag” liner will take the shape of any receptacle as it is form fitting.

Respectfully Submitted,
Carlos J. Negrón
Patent Application # 10/692,485

A handwritten signature in black ink, appearing to read 'Carlos J. Negrón', with a long horizontal flourish extending to the right.
